

17th FOUNDATION DAY PUBLIC LECTURE

Ethics and Academic Integrity

*By - Professor Uday Maitra
Department of Organic Chemistry
Indian Institute of Science, Bangalore*

The importance to follow ethical guidelines and maintain academic integrity in Education and Research cannot be overemphasized. During the past two decades this issue has become increasingly significant and relevant owing to the easy access to information through the internet. It is not unusual to hear about plagiarism, fabrication, and falsification of data in students' reports/research publications/research proposals etc., in many fields.

This lecture will highlight the need to strictly follow ethical practices and maintain academic integrity in education and research at all levels. A few problem cases will also be discussed.
